Geometry

Chapter 1.1 – Points, Lines & Planes "I Can"

Name: _____

LP.1, LP.2, PL.1, PL.2
I Can…
- Define, name, and use proper notation for points, lines, rays, segments, and planes.
- Identify and apply properties of planes and lines.
- Identify and describe the intersection of 2 or more geometric figures in the same plane.

Items in bold should be in your binder or turned in to me
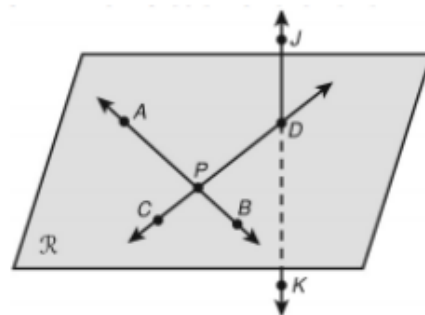

_____**video notes**

_____**worksheet**

_____Pre-mc
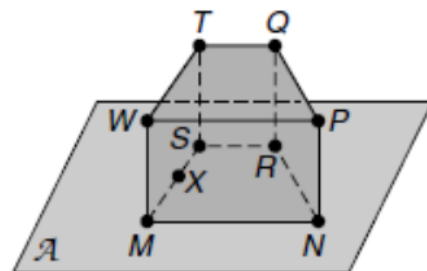

_____**mastery check**

Pre-mc:

Use the picture to the right for #1-3.

1. Name the plane two different ways.

2. Name three collinear points.

3. Name a ray.

Use the picture at the right for #4-5.

4. Name the intersection of planes WTS and QRS.

5. Name the two planes that intersect at line WP.

6. Draw segment GT.

7. Draw plane Z with ray LM.
